

Personal Statement

I'm a passionate Computer Science student eager to join a dynamic team where I can apply and grow my programming skills. With a strong foundation in software development and a creative, problem-solving mindset, I thrive in collaborative environments. My experience spans school and national competitions, where I built real-world applications and led teams to success. These opportunities sharpened my technical abilities, communication, and leadership. I'm excited to bring my fresh perspective, drive, and adaptability to contribute meaningfully to your organisation.

Education

- In Progress:
- BSc (Computer Science) American University of Sharjah (AUS), UAE
- 2021 – 2023:
- IB Diploma Dubai International Academy, UAE

Skills

- C++, OOPs
- Java, PoCs
- MYSQL, Database
- Python, AI & ML
- Assembly, Machine Code
- HTML/CSS, Web dev
- Arduino, IoT
- Javascript, Web Dev

Languages

- English
- Hindi
- Telugu
- Spanish

Certification

- AI Internship program
- Online Summer School on Usefulness of Remote Sensing & GIS for Environmental Studies Indian Space and Research Organisation

Software Engineer Intern
Mahindra Finance, NBFC, India | June 2025 – August 2025

I was asked to ...

- Build and secure backend APIs to support internal digital transformation.
- Create PoC solutions showcasing scalable backend systems for financial operations.

I created...

- A secure REST API using Spring Boot and Spring Security
- Modeled one-to-many relations
- Documented endpoints with Swagger
- Delivered a scalable PoC backend in collaboration with cross-functional teams.

I learnt ...

This internship strengthened my backend development skills using Java Spring Boot, including endpoints with Spring Security and modelling one-to-many relations with JPA. I gained experience using Swagger for API documentation and testing, and learnt how to align my backend systems with real-world business needs

Software Engineer Intern
KIOT, IOT and Smart Solutions, India | June 2024 – August 2024

I was asked to ...

- Create and develop a health-monitoring wearable using IOT and embedded systems.
- Create software to process and display real-time biometric data

I created...

- A smart Fitness Cap using Arduino, integrating sensors to track heart rate, water reminder, and step count.
- Programmed the device for fall detection, GPS imaging

I learnt ...

This internship gave me hands-on experience in bridging hardware and software, especially within wearable health tech. I developed skills in Arduino programming, data flow from embedded systems, and prototyping connected applications. Working with a team helped me understand R&D processes and how to translate broad ideas into tested, user-focused solutions.

IT Support
CAAD AUS, IT Office, Sharjah | February 2024 – September 2024

I was asked to ...

- Provide consistent tech support to design students and faculty.
- Maintain printing, networking, and software systems across labs
- Troubleshoot hardware/software issues quickly and effectively

I did...

- Deliver technical support for printers, design software (Adobe Suite, Rhino), and internal systems.
- Diagnosed issues across Mac and PC systems, ensuring minimal disruption to student projects.

I learnt ...

I gained valuable experience working in a high-demand environment where creative and technical needs intersected. This role taught me how to provide technical solutions under pressure, improve system uptime, and support a user base with unique digital requirements. It also strengthened my communication and multitasking skills while reinforcing my understanding of software-hardware integration.

Operations Coordinator
IEEE-RAS, Robotics and AI, Sharjah | January 2024 – Present

I was asked to ...

- Plan and coordinate technical workshops and robotics-based activities
- Improve student engagement and knowledge sharing in AI and robotics.

I did...

- Organized game development workshops and robotics challenges to boost hands-on learning
- Led a team to teach and conduct robotics workshops

I learnt...

This role gave me leadership experience in a technical club environment. I enhanced my ability to organise collaborative events and teach robotics and programming to students. Through hands-on planning and communication, I was able to not only implement my own knowledge but inspire more students like me.
